

# The Gutter Bin<sup>®</sup>

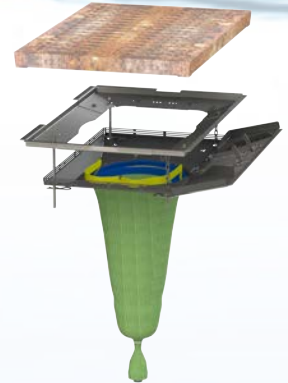

## Stormwater Filtration System

### Why You Need the Gutter Bin

Stormwater washes the filth on our streets directly to local waterways. Frog Creek Partners introduces 21<sup>st</sup> century technology to the gutter. The Gutter Bin offers easy maintenance, quantifiable results, and confidence in its filtration efficiency. The Gutter Bin ensures the protection of public resources and regulatory compliance for years to come. Benefits include:

- **Easy maintenance** - it's fast and simple
- **Measurable results** - equate to regulatory compliance & accountability
- **Risk mitigation** - blockages cause flooding & mosquito borne disease
- **Increase success** - meet community stormwater goals & save money
- **Public awareness** - stormwater pollution is a global problem that starts locally

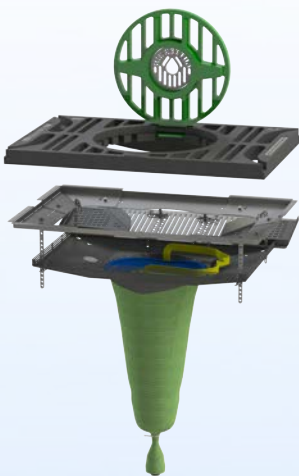

Eco Drop Model

### What is the Gutter Bin?

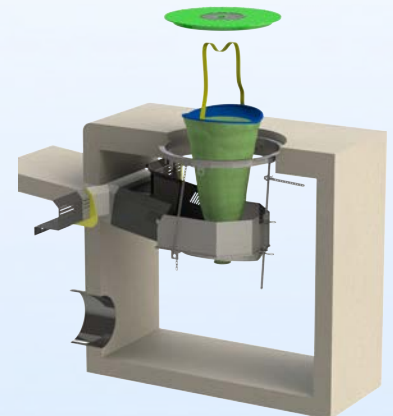

The patent pending Gutter Bin is a stormwater filtration system that removes pollution from flowing water in a drop inlet or curb inlet. An adjustable funnel system directs polluted water into the Mundus Bag<sup>™</sup> filter media. An adjustable overflow allows high flow events to bypass the filter system. In a matter of seconds, a soiled Mundus Bag<sup>™</sup> can be removed from the Gutter Bin, weighed, and discarded/recycled. A new Mundus Bag<sup>™</sup> simply drops into the filter hanger for continued stormwater filtration.

Features include:

- Adjustable overflow
- Customizable fit & function
- Measurable results
- Four season filtration

Original Gutter Bin

Eco Curb Model

### Gutter Bin Specifications

- Meets HS-20 load standards (16,000 lb design load)
- Filter flow rate focused on 1<sup>st</sup> flush pollutants
- Adjustable overflow for variable hydraulic capacities
- Sits flush with the ground so blades don't catch it
- Drop inlet & curb inlet retrofits & new install
- Quality construction with a 7 year warranty
- Backflow prevention technology

### Where to Install Gutter Bins?

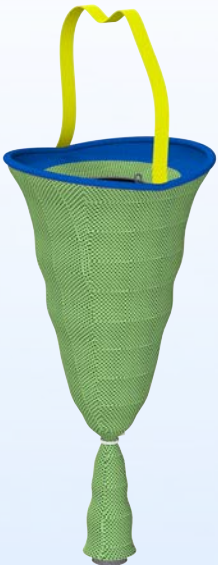

- High traffic areas prone to pollution
- Problematic catch basins
- Unprotected inlets next to waterways
- Downstream of parking lots, bars, restaurants, gas stations, construction sites, intersections, industrial complexes, etc.

# How is the Gutter Bin Maintained?

The Gutter Bin saves our customers time and money because it is the most easily maintained stormwater inlet filter on the market. With a high regard for safety, we can train and certify your team to care for an army of Gutter Bins. Each Bin's service interval depends upon pollutant load, stormwater infrastructure capacity, and weather events. Experience has shown that a 2 to 4 month service interval is sufficient for most environments. Replaceable Mundus Bags can be purchased from Frog Creek Partners with bulk order discounts. The Gutter Bin is cleaned and serviced in a matter of seconds. Our average pollution capture rate exceeds 300 pounds per season. Don't feel like servicing the Bins yourself? Our Clean and Measure Pollution (CAMP) Service offers affordable professional services to maintain the Gutter Bin for you.

## What is the Mundus Bag™?

Mundus Bag™

The patent pending Mundus Bag™ is a disposable water filter that fits inside the Gutter Bin. Stormwater is funneled by the Gutter Bin through the Mundus Bag™ which results in cleaner stormwater discharge and ultimately cleaner rivers and oceans. Multiple filtration configurations are available based upon the customer's pollution capture needs. We partner with industry leaders to incorporate proprietary materials into configurations to address specific pollution capture challenges. Mundus Bags™ can even be installed horizontally in a trench or gutter to remove pollutants without a catch basin.

## What Can the Mundus Bag™ Remove?

- Trash/gross pollutants
- Cigarette butts
- Sediment
- Heavy metals
- Hydrocarbons - chemistry by MYCELX

## Who is Frog Creek Partners?

Frog Creek Partners is an environmental technology company. We offer innovative products that clean water and services that provide measurable results. We are a mission driven company dedicated to improving the health of watersheds by building long-term relationships with our customers, partners, and anybody else who has a passion for clean water like we do. Because Clean Water is a Good Thing™.
